

XM radio should be free to broadcast traffic and weather reports. Placing restrictions on XM is unacceptable. I will never listen to AM or FM again. I am tired of their constant chatter and stupid car sales commercials. I gladly pay the subscription fees on two radios so that I can listen to what I want, not what someone else dictates. If AM and FM can not compete, too bad. It's like VHS versus Beta, and vinyl albums versus 8 tracks, versus cassette tape versus compact discs. Survival of the fittest. The better technology wins and market forcesa, not government dictates should decide.
